## Petroleum Supply Depot Technical Consulting

Project no: AA001266  
Project: Petroleum supply depot  
Service: Technical Consulting  
Project stage: Construction  
Product: Aviation  
Region: South Atlantic / Ascension  
Value: £5 Million (BPA £0.5 Million)

**Construction project management services including design for two new fully bunded aviation tanks (5,000m<sup>3</sup>) and pipework, demolition of existing facilities, floating pipeline replacement, integration with existing facilities.**

The site at Catherine Point is an existing Petroleum Storage Depot (PSD) which is supplied by offshore tanker via a floating hose system, and provides both ground and aviation fuels to RAF and USAF airfield facilities. The project consists of:

- Construction project management services including outline design for two new fully bunded aviation tanks (6,000m<sup>3</sup>) and associated pipework
- Demolition of seven existing storage tanks and associated facilities, replacement / renewal of floating pipeline, integration with existing facilities.
- Outline design and project management of new fire fighting system consisting of ring main hydrant, tank, pumps, etc.
- Development of all ITT documentation for Authority contracted design / construction contracts
- Commissioning and start up of new storage tank facilities
