BPA wins new contract with major power generator.

British Pipeline Agency Limited (BPA) was appointed by a major UK Power Generator to provide care and maintenance services for their 7km x 16" high pressure gas supply pipeline.

The power station is a 775MW combined cycle gas turbine plant in Essex. The award will see BPA deliver services covering pipeline inspection and surveys, audit, emergency response and Cathodic Protection. John Elton, BPA Business Manager commented: "Our longstanding operations and maintenance experience, including local operations, give BPA a great opportunity to demonstrate value to this leading UK Power Generator."
