Location: Home Based (NE/SE/Midlands) with regular UK travel

Position: Permanent

Are you looking for a varied role with Cathodic Protection (CP) and Corrosion Management with travel around the UK? Are you looking for a place to develop your engineering and CP skills? Then BPA could be the place for you.

What will you be doing?

You will join our Integrity Management Team where you'll have the responsibility for the management of cathodic protection (CP) and corrosion prevention on over 1000km of buried pipelines and several terminals.

In this role you will have an eye for detail in the management of BPA's CP systems and lead in the development of BPA's corrosion management capabilities. Managing BPA's CP technicians and contractors you will ensure the delivery of the CP routine monitoring programme, specialised surveys. You will work closely with BPA's technical and operational teams in the delivery of project works to maintain and enhance the pipelines and terminals.

As well as working with BPA's teams and contractors' you'll have the opportunity to represent BPA in UK industry forums and working groups, becoming part of the wider UK pipeline and corrosion management community.

At BPA you will play an important role in the safety and integrity of the pipeline and terminal assets that forms infrastructure critical in keeping the UK moving.

What do we need from you?

Someone who enjoys a varied working life, from days at the desk reviewing data and planning activities to days in the field across the UK on project works and site investigations.

Engineering Technician (EngTech) or Chartered Engineer (CEng) or working towards.

AMPP CP3 Cathodic Protection Specialist (i.e. NACE L3) and a willingness to develop your skills (i.e. to CP4 Cathodic Protection Specialist and beyond)

Knowledge in the use of CP remote monitoring technologies, CMMS and Geographic Information Systems (GIS) or a willingness and capability to learn

Have strong leadership skills and be able to both direct the CP team and work collaboratively across BPA departments.

Be a confident and effective communicator – capable to represent BPA as an expert on national and international industry bodies.

What else?

The role is busy and varied but the rewards, training and development opportunities are great!

BPA recognise that improving our business performance depends on an increasingly diverse team, valuing you for your attitude and abilities over any other background attribute and as a technical business, we are particularly interested to even our gender mix and therefore encourage female applicants.

We recognise that everyone is different, we aim to provide a working environment where each person feels respected, valued and able to achieve their full potential. We also recognise the importance of work/life balance offering flexible working arrangements wherever it's possible.
